

Calliope Crier

The Yakima Valley Audubon Society is people dedicated to the enjoyment and preservation of the natural world. Through birding, education and conservation activities in our community, we raise awareness and promote the cause of global environmental protection.

Volume 38, Number 8

A Chapter of the National Audubon Society

YVAS CALENDAR

Sep 24 Chapter Meeting at the Yakima Area Arboretum at **7:00 pm.**

Oct 13 Board Meeting at Andy and Ellen Stepniewski's house (291 Windy Point Dr., Wapato, 877-6639) at **7:00 pm.**

Field Trips

Sep 23 Wednesday Morning Bird Walk — Meet the group at the Valley Mall Blvd. parking lot for the Poppoff Trail at **8:00 am.**

Oct 14 Wednesday Morning Bird Walk — Meet the group at the Valley Mall Blvd. parking lot for the Poppoff Trail at **8:00 am.**

Oct 17 Fort Simcoe and Medicine Valley — Meet leader Kerry Turley at the Valley Mall parking lot just west of IHOP at **8:30 am.**

Oct 28 Wednesday Morning Bird Walk — Meet the group at the Valley Mall Blvd. parking lot for the Poppoff Trail at **8:00 am.**

Nov 14 McNary NWR and Tri-Cities — Meet leader Bill Drenguis the Valley Mall parking

SEPTEMBER PROGRAM

ANDY STEPNIEWSKI

The Birds of South Florida A Photographic Presentation with George Vlahakis

George and Susan Vlahakis traveled to South Florida in April, 2008. George says, "I had not spent any time in Florida since college spring break in the 1960s but began to realize that it was a mecca for bird and wildlife photographers and a chance to see and photograph many new species. Many of these are large waterbirds, quite different from my usual focus on the small passerines. Of the nearly 100 birds seen and photographed, 34 were Life birds for us. Mammals were sparse (we missed the Florida Panther) but Alligators were plentiful. Severe drought in the Everglades limited the availability and distribution of some species. I will touch on the ecology of water flow in South Florida and its effects on wildlife. Despite the dry conditions, our trip was very successful and we plan another one next year."

PRESIDENT'S REPORT

BILL DRENGUIS

What a Summer! It is great to be back in Yakima for the fall. I am really looking forward to trying to fill Kerry Turley's shoes as the President of Yakima Valley Audubon. It looks like a very doable job because we are fortunate to have a fully functioning Board of Directors that is energized and ready to carry on.

There have been several ideas kicked around to get more members involved in the meetings. These have ranged from discussions on trying a short "infomercial" on basic bird identification, to having a time available for our local birding photographers to show their latest shots.

There is one problem that stumps me and I would love to hear any suggestions. I feel that many members are missing out by not participating in the field trips. These are often led by the very best birders in Central Washington (and sometimes they are led by people like myself who are enthusiastic). Those of us who regularly go on the field trips are often treated to new birding locations: not to mention the chance to have an expert point out new species. Fall migration is here and I encourage everyone (especially beginners) join one of the trips.

Hope to see you outside with a copy of Sibley's in your hand.

(Editor's Note: The whopper Bill is holding in the photo above is a piranha he caught while vacationing in Peru.)

Election at October Chapter Meeting

At the October chapter meeting we will be having an election of officers, as specified by the YVAS by-laws. Here is the slate of candidates:

Director: Angie Begosh

Director: Jan Gano

Director: Bob Wahl

If you are interested in taking part in the leadership of our chapter, please let one of the board members know. Many members of the YVAS Board of Directors have been in their positions for many years. We need new voices on the board to keep our group vibrant and re-newed.

Keep up-to-date with the latest Yakima County birding news on BirdYak

BirdYak is a listserv that is focused on the birds and birding in Yakima County. When you join BirdYak, you can read the latest birding news delivered by e-mail. You can also send e-mails to the group telling of your latest sightings or asking birding related questions.

MEMBERSHIP

DEBIE BROWN

Thank
Mem-

Yakima: Jeanne Crawford, David & Becki Hartwig,
Joyce Lucas,

Wapato: Ruth Kendrick

you for renewing your YVAS
bership!

Please note that the above membership renewals are for Yakima Valley Audubon membership. Renewals to National Audubon are separate and are not listed here.

Its time to think about the Christmas Banquet Silent Auction

Where did you get that beautiful quilted wall hanging of the Great Blue Herons? At the Christmas Banquet Silent Auction! It's true, some amazing items are available every year at the auction, and you make it possible. It's not too soon to think about your tax-deductible donations. I will be helping to run the auction this year, so if you have any questions drop me a line. Please e-mail me at drenguis@aol.com or call 965-5808 for a more personal conversation.

— Bill Drenguis —

After an absence of 20 years, YVAS will be at the fair!

On September 28 and September 30, Yakima Valley Audubon volunteers will be on hand at the Central Washington State Fair in Yakima, partnering with the US Forest Service at their booth. The Forest Service will focus on forest environments while Yakima Audubon will stress shrub-steppe landscapes and the forest-steppe interface (where the bluebirds are!). Both the Forest Service and Yakima Audubon will have displays and exhibits. Our presence will be on the two "Kids Day", so this is a great opportunity to assist in fostering in Yakima-area youth awareness of the regions natural heritage. There is still an opening on September 30 (4 pm-7pm). If you would like to participate, call Andy Stepniewski at 977-04.

You can subscribe to BirdYak on the BirdYak website: <http://groups.yahoo.com/group/birdyak/>. Scroll down to the bottom of the page for directions.

Or you can send an e-mail to Denny Granstrand (dgranstrand@charter.net), and he will add you to the list.

CONSERVATION REPORT

MICHAEL MARTIN

Closing a Green Dot Road in the Upper Wenas

In late August, the Washington Fish and Wildlife Department and Department of Natural Resources held public meetings to consider the closure of certain Green Dot roads and opening other roads in the Wenas and Wenatchee areas. I received some emails with concerns that WDFW and DNR might be considering closing roads accessing the Audubon camp and other popular birding sites. That's not the case in the proposal.

For the Upper Wenas, the proposal is to close part of the Hardy Canyon road that travels to the crest of Mount Clemens, and to open up a new road -- the Woodcamp Ridge road (a timber harvest road built a couple of years ago along a ridge top a little to the west). Cindi Confer from WDFW said the upper part of the Hardy Canyon road is a stream-adjacent parallel road that doesn't meet forest practice regulations. Basically, the forest practice rules say that a road adjacent to and parallel to a stream (even an intermittent one) has to either be improved so a regular vehicle can drive on it, and culverts added, or the road has to be closed. Anyone who has driven up the road past the old quarry knows it's a scary road that will scratch up your vehicle. For birders, the little parking area and walk-thru on Wenas Road will remain. The vehicle access thru the gate a little to the west will also remain open. The road will be closed where it begins to climb alongside the creek in Hardy Canyon. The bridge over Wenas Creek will be removed and replaced with a foot bridge. All in all, the rule and the changes will better protect habitat. Even though the creek there is usually dry, sediment falling from the road eventually is washed down into fish bearing water.

Critical Areas Ordinance Update

The Yakima County Commissioners ended their mark up of the proposed amendments to the Critical Areas Ordinance (CAO) following input at public hearings, and plan on passing amendments in September. The amendment was initially proposed to settle in part challenges to the 2007 CAO filed by Yakima Audubon, the Washington Fish and Wildlife Department, Futurewise (a state-wide environmental group), the Yakama Nation, and some Upper Wenas property owners. We challenged that the earlier CAO failed to provide protection for habitat associated with critical species, as required by state law.

While the originally proposed amendment would settle Yakima Audubon's challenge, the Commissioners have elected to back track, specifically by allowing building of roads up to one-half mile long and clearing of up to one-half acre with no review for impact to critical areas. And, while the Commissioners will include a map of critical habitat comprising the remaining shrub steppe in Yakima County with habitat value, they are adding and deleting words to imply the map doesn't apply to private property, although the text of the ordinance taken together doesn't really say that. All in all, there's enough backtracking that Yakima Audubon will be

taking the issue to the Eastern Growth Management Hearings Board. The Board can order a county to make changes, or can invalidate an out-of-compliance ordinance. Our hearing date will be in early December. I believe some of the other groups will also appeal -- the parties need to see what the Commissioners actually adopt, and that hasn't happened yet.

Wind Farm Siting

A while ago, Betsy Bloomfield from The Nature Conservancy spoke at one of our monthly Audubon meetings about the siting of wind farms, and the need for the environmental community to get ahead of the curve by surveying location of critical species and obtaining baseline data so that cogent comment could be made when a new wind farm location is proposed. Currently, once a project is proposed, there isn't sufficient time in the process to obtain data to impact the siting.

The autumn 2009 Nature Conservancy Magazine includes an article by Madeline Bodin, *An Ill Wind: Wind power might slow global warming -- but will all those windmills hurt nature?* The article focuses on wind farms placed on native tallgrass prairie in Kansas. Only 4% of the original expanse of this prairie land remains, replaced by agriculture -- much the same story as with shrub steppe here.

The article describes a wind farm built on an area called Flint Hills, one of the only remaining patches of tallgrass prairie. Bodin writes: "When it was built, the Elk River project caught The Nature Conservancy's team in Kansas by surprise. Since then, Rob Manes [The Nature Conservancy's director of conservation in Kansas] has been working overtime to steer wind farms away from the Flint Hills and other large, intact grasslands that make up much of the habitat for ground-nesting birds, including imperiled species such as the lesser prairie chicken."

Rob Manes has been participating with a group of industry, government and conservation groups working and the U.S. Fish and Wildlife Service regarding federal guidelines being developed for siting wind turbines. As Bodin writes, the discussion has "brought the idea of a public database to the table. The database Manes has in mind not only would provide maps of important environmental data, such as critical habitat for endangered species, but also would designate wind-friendly areas where turbines and wildlife are less likely to be in conflict. Manes is more concerned about habitat issues -- whether the future of an entire species is put at risk, rather than how a few individuals are affected -- or what he calls the "subpopulation" effects of wind turbines on wildlife. He sees, after all, how some species, such as sage grouse and the lesser prairie chicken, can be driven out of their habitats by wind development without a single bird ever touching a single turbine blade."

Conservation continued on page 5

FIELD TRIPS

ANGIE BEGOSH

Please call the leader before the trip to let him/her know you are interested in going. That way, if plans need to be changed, he/she can call you. Also, if no one calls, the leader will know to cancel the field trip and won't be sitting around at the meeting place all alone! Be sure to wear clothing appropriate for the weather and take lunch, snacks and beverages. Also please make a contribution to the driver for gas when you carpool.

- Sep23 Wednesday Morning Bird Walk** — Meet the group at the parking lot at the east end of Valley Mall Blvd. at **8:00 am.**
- Oct 14 Wednesday Morning Bird Walk** — Meet the group at the parking lot at the east end of Valley Mall Blvd. at **8:00 am.**
- Oct 17 Fort Simcoe and Medicine Valley** — Journey out to the marvelous grove of Oregon White Oaks at historic Fort Simcoe where Lewis's Woodpeckers's, surely one of the most charismatic of its clan, can be numerous. Look for other birds of oak woodlands such as White-breasted Nuthatch and Western Scrub Jay. Meet leader Kerry Turley at the Valley Mall parking lot just west of IHOP at **8:30 am.**
- Oct 28 Wednesday Morning Bird Walk** — Meet the group at the parking lot at the east end of Valley Mall Blvd. at **8:00 am.**
- Nov 14 McNary NWR and Tri-Cities** — This trip offers a superb opportunity to study a variety of waterfowl, including geese, dabbling and diving ducks at McNary Pool at the refuge headquarters. Birds of prey, gulls and songbirds will also be looked for. Meet leader Bill Drenquis at the Valley Mall parking lot just west of IHOP at **7:30 am.**

Please contribute for gas when you ride on field trips

With high gas prices it is important for all participants to contribute for gas. Based on four people in a car, here are the totals per person: 100 miles driven on the trip — \$5.00 each; 150 miles — \$8.00 each, 200 miles — \$10.00 each; 250 miles — \$13.00 each; 300 miles — \$16.00each. Please pay your share; if drivers have to pay most of the gas bill, they may quit driving.

NOW & THEN, BIRDS AND MEN

RICHARD REPP

Flash back over one hundred years to the thoughts of W. Leon Dawson in his 1900 book, The Birds of Washington: "... but never while the hearts of men are set on peace, and the minds of men are alert to receive the impressions of the Infinite will there be too many birds to speak to eye and ear, and to minister to the hidden things of spirit. The birds belong to the people, not to a clique or a coterie, but to all the people as heirs and stewards of the good things of God."

And no, I am not trapped in a weird time warp. The above paragraph was quoted in last month's column; I'm so fond of it I decided to use it again as "too many birds" seem to be falling between the cracks locally judging by the sparse sightings reports of late.

Birds common to the Valley's lowlands in winter are definitely on the move. On August 28, **Andy Stepniewski** turned up his first yard **Dark-eyed Junco** and **Townsend's Solitaire** of the season in Parker Heights. On Sep 11, three **White-crowned Sparrows** were cavorting in the 18th Avenue yard of **Stan and Lori Isley**.

Though there is certainly nothing laborious about a **Merlin's** flight, one turned up in my 37th Avenue neighborhood on Sep 7, Labor Day. In Pete Dunne's Essential Field Guide Companion (2006), the aforementioned Pete states, "... very few creatures covered with feathers and smaller than a pigeon want to be near a Merlin." Small birds are the bulk of the Merlin's diet and it is "particularly fond of flocking species, which it commonly secures in the air." Pete remarks, "The expression is mean—real mean" and Merlins are "downright hostile towards other raptors."

On Aug 30, at **Scott Downes'** home near 50th and Englewood Avenues, an **Anna's Hummingbird** sipped at a feeder also frequented by a **Calliope Hum-**

Merlin
Photo by Mike Roper

“Now and Then, Birds and Men” continued from page 4

mer. Kenn Kaufman’s 1996 book, The Lives of North American Birds, points out that, “This hardy little bird is a permanent resident along our Pacific coast, staying through the winter in many areas where no other hummingbirds are present. In recent decades it has expanded its range, probably helped along by the flowers and feeders in suburban gardens. It now nests north to British Columbia.” While Anna’s do not breed in the Yakima Valley, they have been noted on many of YVAS’s Christmas Bird Counts.

August seemed to be a good month for lowland **Band-tailed Pigeon**. **Denny Granstrand** dutifully grabbed one for his yard list early in the month and **Scott Ray** respectfully snared another pied-billed pigeon flying along Hwy 12 near Rowe Fruit at mid-month. Birds in flight pose little challenge for Scott as he lassooed a couple **Western Scrub Jays** sailing east over the Poppoff Trail early in September.

Wenas Lake is staking claim to the month’s hottest hot spot. On Aug 17, a **Black Tern** was eBirded near the dam by **Richard Repp**. Andy Stepniewski muses in his 1998 book, The Birds of Yakima County, Washington, that although Black Terns were known to breed in the county prior to the Great Depression, “It has since disappeared for unknown reasons, though the marshes where it once bred still exist (Byron Ponds) and are protected as a state wildlife area.” In their 1940 book, Birds of the Pacific Northwest, Ira N. Gabrielson and Stanley G. Jewett wax a bit poetic on this tern’s virtues, “In any plumage, this is a dainty, lovable inhabitant of the marshes. It has something of the swallow about it, darting, twisting, and turning about the tops to the tules, from which it expertly picks the insects that from a large part of its food. Few people can watch it without getting a thrill as it winnows the marshes on graceful wings. It is such an expert on the wing and performs so easily that it is most impressive.”

But perhaps this month’s most prestigious Wenas wonder was weaned on Aug 23 by **Jim Christensen**. **Short-billed Dowitchers**, according to shorebird expert Dennis Paulson in his 1993 book, Shorebirds of the Pacific Northwest, are “primarily a bird of salt water” As the almost identical in appearance Long-billed frequents inland fresh water “... the smattering of records (of Short-billed) from eastern Washington are mostly sight records, of which older ones, especially, are dubious”. ,” Dennis continues, “The best ‘field mark’ for all plumages is the call. “Short-billed seem almost invariably to call *tututu*, a staccato series of low, musical notes...Long-billed typically call *keek* or *peep*, a single much higher note.” Jim not only heard the dowitcher call, but he was able to document the record with excellent photographs. The diagnostic brighter feather colors of the juvenal plumage of the Short-billed Dowitchers are aptly captured in Jim’s portraits.

Band-tailed Pigeon
Photo by Denny Granstrand

Have all the birds in Yakima disappeared or dramatically decreased in number? Or have usually reliable observers (that’s YOU, by the way) been lax in sharing sightings? Fall migration is upon us. Many species will be returning to winter; others will just be passing through to southern points. Please e-mail me with your bird sightings at Rich71@aol.com or phone me at 965-1134. Better yet, if you use the Internet, post your reports to BirdYak.

Conservation continued from page 3

Closer to home, anecdotal evidence runs both ways. At the Wild Horse Wind Farm east of Ellensburg, workers found a sage grouse nest at the base of a wind tower. Others have suggested that a line of towers acts as a barrier to sage grouse migrating to new habitat. With the Wild Horse project and another approved wind farm between the Vantage Highway and I-90, to the extent wind farms do act as barriers for sage grouse, the Whiskey Dick shrub steppe is being effectively fenced off.

The Nature Conservancy article is thoughtful and should be read. It’s online at <http://www.nature.org/magazine/autumn2009/features/>.

Vredenburgh Trail, Slow Start But Another Record

The trail is a string of nest boxes beginning at the end of the pavement on North Wenas Road and stretching 13 miles to the intersection of Durr Road just above Ellensburg. Established by YVAS members in 1982, the trail now consists of 132 boxes.

In 1994, the trail was named in honor of Virginia and Harold Vredenburgh to recognize their years of tireless devotion to help bluebirds flourish in Yakima County.

Once again a cool spring resulted in most nest occupants waiting until late May before laying clutches of eggs. The result was a huge surge of nestlings popping up in June. The monitor sheets divide the trail into four sections of 33 boxes each. On June 15, monitors on the third leg encountered a string of 23 consecutive boxes (#65 through #87) with nestlings inside. The third leg went on to produce 177 fledglings, 33 more than any of the other three sections.

Last year's total of 569 fledged bluebirds was an all time record for the Vredenburgh Trail. This year's initial surge during June was great enough to enable the bluebirds to smash that record with the bluebird fledge total hitting 577.

Look for our annual recap for each box in the October Crier.

Bird walk for the “Big Read”, sponsored by the Yakima Valley Libraries

Yakima Valley Libraries has selected Dashiell Hammett's “The Maltese Falcon” for it's Big Read selection. Free copies of the book will be available at public libraries throughout the county in late September, and a number of discussion groups and events will tie in to the program in October. Since the book has a bird in the title, and since we really do have falcons in Yakima County (unlike with last year's selection “To

Kill a Mockingbird”), and since I'm a librarian in my day job, we will have a bird walk at Yakima Sportsman Park on Saturday, October 10 at 9 am. This walk is especially targeted to families, and we will have special treats for kids. Meet at the pond on the north side of park.

— Michael Martin —

Use the following form for membership in the Yakima Valley Audubon Society. A separate membership is required for the National Audubon Society. Please use the form sent to you for renewal of your National Audubon Society membership. Current membership will be honored until their expiration date. At the time of the renewal of your National Audubon Society membership you will need to send in a membership to the Yakima Valley Audubon Society in order to continue to receive the *Calliope Crier* and other local membership benefits.

YVAS MEMBERSHIP

Join or renew your annual membership to the Yakima Valley Audubon Society to receive ten issues of the *Calliope Crier* and all chapter membership benefits. National Audubon membership and *Audubon Magazine* are not included with your YVAS membership.

Yakima Valley Audubon Membership \$25
Yakima Valley Audubon Senior (62+)/Student Membership\$15

I do not wish to receive any solicitation or communications from NAS (please check if applicable)
